PROFESSIONAL SUMMARY

Results-driven Software Engineer specializing in Backend Development and Data Analytics, with hands-on experience building scalable REST APIs, automating ETL pipelines, and delivering actionable business intelligence through interactive dashboards. Proficient in Python, Java, SQL, Django, FastAPI, and Power BI. Adept at integrating AI/LLM capabilities into production systems and passionate about engineering data-driven solutions that create measurable business impact.

TECHNICAL SKILLS

Languages:	Python, Java, SQL, JavaScript, HTML, CSS
Backend & Frameworks:	Spring Boot, Django, FastAPI, REST API Design
Data & Visualization:	Power BI, Tableau, ETL Pipelines, Data Validation
Databases & Tools:	PostgreSQL, MySQL, Redis, Docker, Git, Postman

PROFESSIONAL EXPERIENCE

Associate Software Engineer Intern Oct 2025 – Mar 2026
ThynkTech India, Pune

- Developed data-driven backend services in Python to process structured datasets and generate actionable business insights.
- Built and optimized ETL data pipelines, integrating analytical results into backend systems to support automated reporting.
- Designed interactive Power BI dashboards to visualize key performance indicators and monitor system health in real time.

Platform Developer Intern Aug 2024 – Nov 2024
Standard Learner, Pune

- Engineered AI-driven chatbot systems and integrated third-party APIs to enhance platform automation and user experience.
- Validated and cleaned large datasets to ensure data consistency and reliability across internal applications.
- Restructured backend workflows, achieving a 15% reduction in processing time and improving overall system efficiency.

TECHNICAL PROJECTS

SHL Assessment Recommender – Conversational AI Agent (Python, FastAPI, Groq API, Llama 3.3 70B)

- Built a conversational AI chatbot enabling HR managers to discover SHL assessments via plain-language queries, eliminating manual catalog searches.
- Embedded all 37 verified SHL assessments in the system prompt for 100% recall; enforced strict JSON output and URL whitelist to prevent hallucinations.
- Designed a stateless REST API (FastAPI + Uvicorn) with full conversation history per request, enabling horizontal scalability with zero session storage.

Retail Sales Forecasting & Analytics (Python, Scikit-learn)

- Analyzed historical sales data to uncover trends and built time-series forecasting models to support demand planning.
- Performed feature engineering and built visualizations to communicate insights; evaluated multiple ML models to optimize forecast accuracy.
- Presented results with actionable business recommendations using interactive dashboards and statistical summaries.

Real-Time Collaborative Task Manager (Django, WebSockets)

- Developed a Trello-style real-time task management app supporting concurrent multi-user collaboration via WebSockets.
- Implemented JWT-based authentication, relational task-dependency schemas, and caching strategies for low-latency performance.
- Designed scalable architecture with role-based access control and real-time event broadcasting for seamless team workflows.

EDUCATION

Bachelor of Engineering in Computer Engineering July 2026
ISBM College of Engineering, Pune | CGPA: 7.50

Diploma in Computer Technology July 2023
Sanjivani K.B.P. Polytechnic, Kopergaon | Score: 84.97%
